

Art & Skills of Study 100 Pieces of Chalks

Beautifying Minds with Primal Ingenuity

Success Architecture USA

Program Brief

Learn in this training program the strategies, thinking and mental tools that scientists used to gain knowledge throughout history. What is the role of Success Architecture primal mechanisms and how can you use it at school and work. Practice the study skills that will enable you better grades and a sound understanding. What are the bases of success? How can you design and build a strong personality? How to acquire better grades? Do your homework and face tests without any worry? Break the fear and the pressure when preparing for major tests. Concentrate and prevent mind shattering that happens to all of us. What are the organizing tools to use? Use your mind energies to serve your purpose. What are thinking, creativity, innovation and how to use them to succeed at school and in life? What are our learning mental patterns? Self Improvement professionals claim that a young adult at twenty knows as much information as the British Encyclopedia. How is that possible? How can our Brain memorize this vast amount of information just by being there? How can we use this to learn? What are our primal learning patterns? What is your style?

All these questions, tools, skills, and learning capacities helped thousands of scholars all over the world and in all stages of their lives. Whether you were a high school, university, college, or higher education this course will unlock the user manual to your brain.

Why is this Program Important

Most educational curriculums concentrate on the subject matter, abstract memorization, and how to pass tests; completely disregarding the natural and primal methods for knowledge gain. One of the most important problems facing our students in schools and colleges is learning difficulty. In order for us to learn how to learn, one must learn the best mental and primal tools to acquire knowledge in the most successful way. Students face a miriad of stress today coming from our societies glorifying college degree holders and demeaning others. Common knowledge assumes a bright future for degree holders as a matter of fact, where as school drop outs have it difficult. This horrible feeling creates an anxiety in a students life when stdying for tests, homework, and doing project. One of the most important gains from this training program is the capability to deal with your stress, cope, and maintain a unique presence that overcomes an anxiety that may cause failure.

The Success Architecture tools and skills you will learn in this training program were selected to make studying, memorizing information much easier. What are the easy habits, steps, and daily practices you can pick up to acquire on going success in your life. You alone can make the decision to succeed, and this program presents to you the prescription, the easy flexible primal methodology to own your success as a scholar. If you were a successful student not facing learning difficulties; Success Architecture will show you natural primal methods enabling you to leap forward. While if you were facing learning difficulties; our tools, methods, and skill set will help you understand and deal with your difficulty. You will overcome your obstacles, and develop your best.

The purpose of this Training Program

Practice 100 learner's tool you can use in your study, school, and work. Using a subset of these tools is enough to put you successfully through University, College, and general schooling. Train your brain to gain super capabilities at memorizing, thinking, creating, and innovating. Use these tools to learn and gain general knowledge. What is the Creative Success Architecture System? Put the system to daily use to accomplish and fulfill your destiny. Learn the natural equilibrium among success energies, and use it to your advantage. Speak to you brain in its primal languages to ease data recording and retrieval. Learn the nature of your brain and the information learning paths and use them fully for gaining knowledge. Learn our memory effects and systems so that you can use them automaticaaly to solícite learning whenever you desire.

Program Training Topics

Topic One: Recorded Information and Knowledge Structure in the Human Brain.

In what ways do we gain our knowledge? What shape, form, and relationships do they take? We will learn that data groups are our knowledge clusters; while our creative new ideas form in the space between our data. Learn how to make creativity and idea generation flow naturally, repeatedly, spontaneously, and when we require.

Topic Two: Overcome learning difficulties.

Do you have a learning problem with using or understanding language? How are your Listening skills? Can you think clearly and express yourself? Do you difficulty reading or writing? Can you do regular Math easily? Learn the difficulties we face when learning; how to overcome these and improve our capabilities by orders of magnitude. Use easy to learn tools and methods from Creative Success Architecture.

Topic Three: Learn how your brain is organized and how you can keep it young and healthy.

Follow up on our physical brain development from conception, to birth, and maturity. Learn what changes take place in your brain through various stages and the impact on your behaviour. What are the primal, emotional, and thinking brains? What is the role of each in your life? Our wonderful three brains are a miracle in their own right, and they form at different stage in our lives which dictates changes in brain function. We are born with our primal brain and that has effectively shapes our entire lives; how can we use our primal creativity?

Topic Four: What is Intelligence? What is thining? What is the difference between them?

What is the difference between the various types of thinking? When do we use each type? Learn various tools for creativite, logical, and emotional thinking. How can you reach ingenuity in your actions using a well established and easy to use Success Architectture procedure? Use the primal ingenuity process to be wonderfully creative each time you embark on generating new ideas.

Topic Five: How is the Brain defined and what are the various definitions?

What is our Brain? What is the difference between brain and mind? What do we mean by left side vs. right side and is there really a functional segregation between the two sides of the brain? What do we do to use our whole brain? What does it mean? How can we use it as a thinking, creative, and learning tool? Exercise thinking tools to change your perspective from sequential view to parallel, Singular to whole? When do you change your perspective and what can you gain by doing so? How did Geniuses use this wonderful primal thinking tool?

Topic Six: Whole brain range reading.

How can listen to comprehend? How can you cure some learning issues using whole brain range reading? Use active listening and use whole brain to write, create and take a new perspective at Mathematics.

Topic Seven: What is natural ingenuity?

Develop your common sense, wisdom, sense, prediction capabilities, ingenuity, and thinking. Can we learn to become genius with our existing mental capabilities? Or is ingenuity reserved for some of us? What is the "Intelligence Trap"? How can you avoid it using your brain plasticity and its inclination for change and momentarily reorganizing?

Topic eight: Learn how to gain acute concentration and prevent mental shattering.

Tools to help students concentrate, when listening or reading. Use the "echo" method to concentrate during lectures. What is mental saturation and how can you prevent it or escape its effects.

Topic Nine: Learn tens of brainiac tools to help you study, learn, excel, and succeed distinctively.

How to make success and reaching your destination like the 100 mile journey? Take the required steps confidently, easily, steadily, boldly, and affordably. Self Development experts contemplate that taking small steps daily and repeatedly is a definition for success in its own right. One of the most difficult decisions you have to make is taking the same continuous steps day in and day out. A student who goes to his lectures every day, comes back home, does his homework, reviews and prepares for next day is bound to succeed. Who takes a mile step by step will reach and accomplish his aim for sure. This understanding is an easy way of putting success but it has deep meaning. This saying goes for medical doctors, Engineers, Lawyers, and all type of professions.

Topic Ten: Simple Planning and Organization.

Organizing is one of the most important tools we stress in this training with application to study and learning. Planning in "Thinking in the Fourth Dimension"; and that is time. How can you devise a reasonable work plan for a study period and follow it through to success. What are the success and failure parameters in the plan; how can you guarantee plan success to learn and pass your final exams.

Topic Eleven: Create a balance between your learning goals and your other personal goals.

What is the importance of concentrating on your most valuable objective in your life? Explore the nature of your first primal brain. Know what you want in life and set your destination so that it does not contradict your basic nature.

Topic Twelve: Understand your Comfort Zone and how escaping it is crucial for success.

How important is it to escape your comfort zone? Learn how to acquire the necessary Creative Success Architecture forces to break out of your comfort zone. To exist the comfort zone means that your brain is in a state of motivation, and acute concentration for learning and gaining knowledge. It is very difficult to learn and stay within this sluggish mental zone.

Topic Thirteen: Divide and conquer time.

There is a very famous Arabic proverb: "*Time is like a sword; if you do not cut it it will cut you*". In a way cutting time is synonymous to dividing time. Organizers, planners, and successful people always divide time and use it to their advantage to accomplish seemingly the impossible. Learn how to manage your precious time, organize your daily chores, and prevent time stealers from wasting your most precious commodity; time. Use the importance and urgency matrix to organize yourself in the most efficient methods and in ways that agree with your set goals and objectives.

Topic Fourteen: What are the natural forces generating from the Creative Success Architecture System?

Learn how to use these forces for studying and learning. Use the forces generated from Creative Breakthrough to write research papers and solve your most difficult problems. Learn tools to develop your positive energies, overcome your negativity, break your chains, and overcome boundaries. Generate the Creative Success Architecture synergetic force and use it to obtain self mastery.

Topic Fifteen: What is implied learning? Learn its primal mind tools.

Each tool has a different signature, learn the tools that are most pertinent to your learning style. What mental style do you exhibit for implied and speed learning? Discover and make use of these findings in your learning or work.

Topic Sixteen: How to get rid of unwanted habits or behaviors? How can you enhance learning desired characteristics?

Behaviour changing tools will help you rid of unwanted characteristics and undesired habits. What is the cognitive signature of a habit and when does it take over our behavior? Deploy your conscious shields to reprogram behavior, habit, and routine. Identify any encouraging environment for bad habits and change them to escape the behavior trap. Program your self with new good behavior to overcome and erase old, undesired characteristics.

Topic Seventeen: Mind Maps.

Where does a mind map come from? How does data structure form in our brain into information? What is the importance of using whole brain learning techniques, and how? Use mind maps to take notes, write, remember, create, innovate, present, communicate, plan, and organize.

Topic Eighteen: The Mind is an incredible Data Base.

Mind data storage and how does retrieval work both logically and creatively. How to organize, store and use a variety of information storage areas in your brain in order to ease multi retrieval? What is the role of questions in information retrieval and how is that related to Creative Success Architecture and your brains primal instincts? How can use the multi facet information storage capabilities of your brain and how does that help retrieval?

Topic Nineteen: Design your personality and character.

What are the characteristics of personality? How can you build a strong successful personality in your life? How can you have a strong presence? How to avoid personal and mental distortion? What are the patterns of mental perversion? How does negative thinking affect your success? How can we influence others? How can others influence us?
